Write Your Score Here: (total number of “falses” circled) _______

List one to three careers that you are considering at this time.
1.
2.
3.
Scoring:

Give yourself a point for each “false” answer. Write the number of points that you have in the blank below:

What Your Score Means: My Score: __________

If you received a score of **20 - 25**, you are really on top of things and have obviously done a great deal of work on your career goals. These activities will be a good chance for you to affirm those goals. You might, however, want to spend some time analyzing those answers that you did mark “true.” Also, understand that many individuals begin with clear career goals only to have them change. This is normal and okay.

If you received a score of **10 - 19**, your career management process is probably typical of a student who is beginning, and these activities will be very helpful with setting some career goals. If the majority of your “true” answers were in questions 1 - 10, you might want to work at gathering “self-information” and meet with your Career Counselor.

If you received a score of **less than 10**, never fear; you just need to spend a little more time on all of the phases of career decision-making. These activities can definitely be helpful. Also it might be helpful to take a trip to the Career Center and schedule an appointment to talk with a Career Counselor.

Additional Info From The Scoring:

If the majority of your “true” answers were in questions 1-10, you might want to gather more “self-information” and meet with your Career Counselor to do a **values inventory**.

“True” answers in questions 19-25 indicate that you may be dealing with some emotional issues involved in career decision-making and may need to speak with your Career Counselor.
